Notice of Change of Color Standard Setting
for Plastic Parts

DATE: March 26, 2020

Dear Valued Customers:

Hu Lane has been in the connector industry for over 43 years. Time really flies and we would like to thank you for your continuous support all these years, and forever more years to come.

In our continuous improvement plan, one of the main objectives as engaged currently is to set color standardization for all our plastic parts according to the international standard color codes and as reference standard for our future new product development.

Due to the need to revise the color standard for the plastic parts and to bring our current existing product colors closer to the international color standard as soon as possible, we will be successively sending notification to customers for those plastic parts that require color change.

Please note that the change in color specification is only fine-tuned in color, which does not affect any structural dimensions/sizes and/or function/performance of products, and certainly does not affect the current usage of products.

Thank you once again for your support and co-operation in our continuous effort to reach the goal of international standard.

Sincerely Yours,
Group Research and Development Center
